What makes us different?

Since selling our first cameras in 2020, we have worked tirelessly to develop a reputation for quality, durability and honesty.

We are an independent, family-owned business that takes pride in helping every customer, as if they were family.

We are neither the biggest, nor the cheapest. But as competitors seek profits by charging extra fees and offshoring customer support, we proudly stand behind our cameras with a **no-B.S. lifetime warranty**.

70 million pictures later, the difference is clear. Welcome to the family.

BUQEE

Ben Vander Velden
Founder

A lifetime warranty

that doesn't hide behind fine print

Camera & solar panel malfunction

If you have an issue with your camera and/or solar panel that cannot be resolved, we'll repair or replace your camera / solar panel with a new or refurbished one **at no cost**. You only pay for shipping.

Animal / natural disaster coverage

Destruction or malfunction caused by an animal or natural disaster is covered for life. **This includes hurricanes, forest fires, floods, bears, cattle, etc.** You only pay for shipping.

Replacement parts

Swappable components including the antenna, glass lens cover, PIR motion sensor lens, straps, SD card, SIM card, and the black battery pack housing are covered for life. We can a) ship you a replacement part that you install or b) you can ship us the camera and we'll replace the damaged component for free. In either case, you only pay for shipping.

Blue lithium-ion battery cells

Lithium batteries naturally age and degrade over time. We use extreme-weather, commercially-available 18650 lithium-ion batteries, which come with a two-year warranty. After that, if your batteries degrade, you'll need to purchase compatible replacements from us or elsewhere.

Obsolescence due to cellular network changes

It's likely that in the future, mobile network operators will decommission their 4G networks. When they do, we'll offer a replacement camera that is compatible with then-available networks at **no cost**. At that time, you will only pay for shipping.

This warranty is fulfilled directly between the customer and Yellowstone.ai. **Dealers have no responsibility to handle warranty claims.**

Requirement

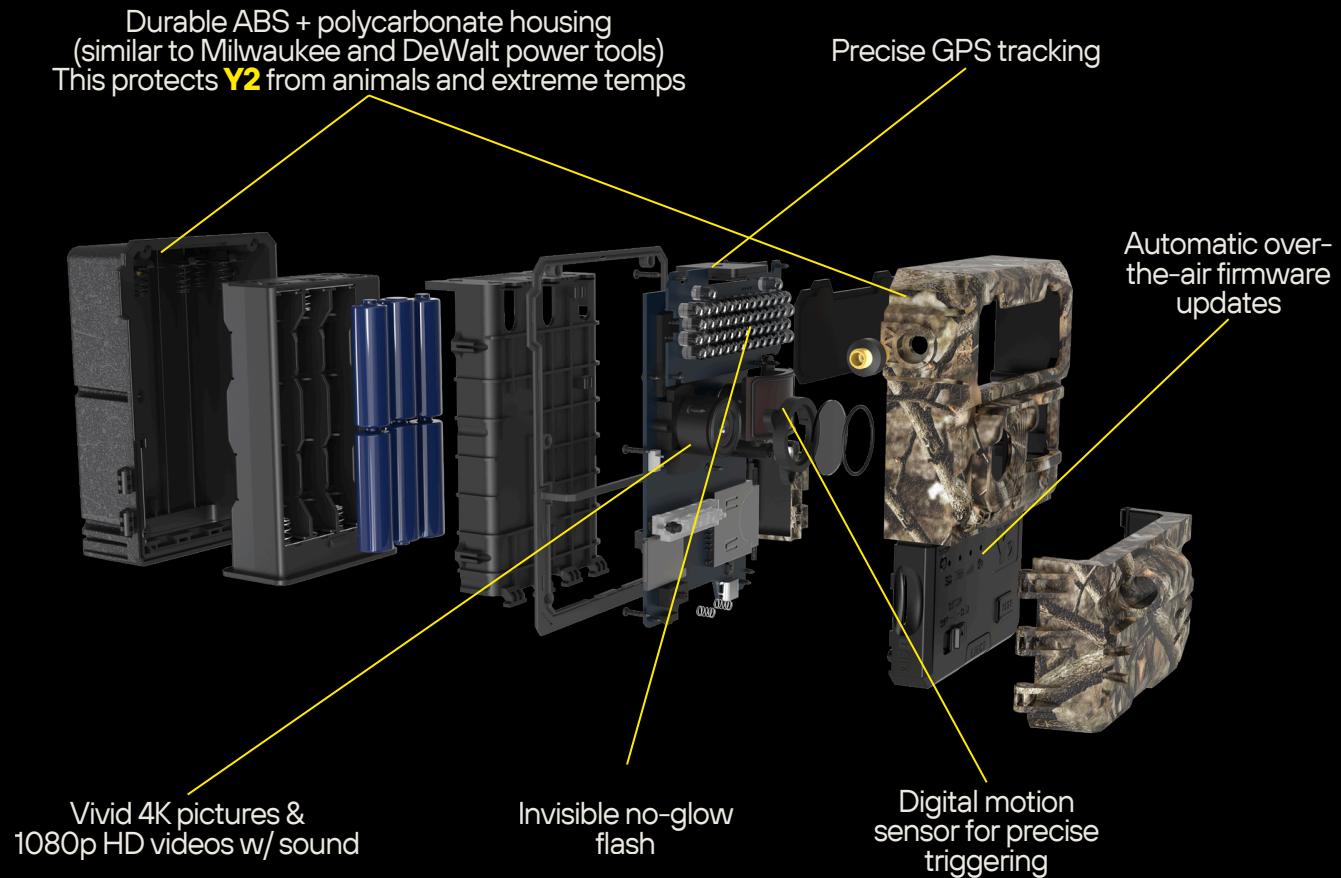

Our cameras have advanced capabilities for remote monitoring, which is one of the reasons we're able to offer the industry's only lifetime warranty. In order for us to properly monitor and update a camera's health and systems, we ask that your camera maintain a data plan and connection for at least 60 days per calendar year.

Products

Item	UPC	Description	Retail Price
Y2	704260671788	Our flagship camera 60° field of view Includes strap, SD card, SIM card	124.99
